

# What can we develop together?

## 1. ABOUT CRUX

Crux are world-leaders in the design, simulation and analysis of medical devices and consumer products; working as a trusted partner to many medical companies and household brand names, our projects touch lives by delivering a vast array of products to global markets.

## 2. SENIOR MECHANICAL ENGINEER

We're on the lookout for a talented Senior Mechanical Engineer to join our team. If you're interested in working on multi-disciplinary engineering projects that tackle some of the toughest briefs in the medical and consumer goods sectors, then we want to hear from you!

As a Senior Mechanical Engineer at Crux, you will be leading high-profile client projects whilst also having a key role in the development of the team's capabilities and operating processes. You will lead from the front, consistently demonstrating excellence in analytical, creative and experimental skills to ensure the successful delivery of project work to your clients.

### 3. WHAT WE'RE LOOKING FOR...

- Achieved a First classification in a relevant accredited degree program.
- 5+ years of experience in hands-on engineering roles with demonstrable achievements.
- Technical leadership skills and an ambition to develop others in your areas of expertise.
- A track record of excellence in technical work and communication.
- Strong mathematical skills and ability to apply “first principles” to problems.
- In-depth knowledge of a wide range of engineering processes.
- Experience managing clients, customers or other external stakeholders.

### 4. WHY YOU'LL LOVE WORKING HERE

We are a dynamic and fast-growing engineering consultancy that takes pride in its outstanding work and supportive work environment. As part of our team, you'll be working within a family of high-performing expert engineers. Our strong community is built upon effective communication and happy employees, collaboration in project work and regular social events are the norm.
