

What can we develop together?

1. ABOUT CRUX

Crux are world-leaders in the design, simulation and analysis of medical devices and consumer products; working as a trusted partner to many medical companies and household brand names, our projects touch lives by delivering a vast array of products to global markets.

2. PROJECT MANAGER

Crux Product Design is looking for a talented Project Manager to join our project management team in Bristol. This is an excellent opportunity for someone looking to further their career and work on some of the world's most exciting product development projects.

In this role, you will work with our multi-disciplinary design and engineering teams to project manage the development of medical and consumer goods devices, from concept through to production. This is a key position of responsibility and your success in this role will be central to the success of the company. We need an innovative, experienced and delivery focused individual with the drive and enthusiasm to push forward relentlessly in a fast paced and supportive team environment.

3. PRINCIPAL RESPONSIBILITIES

- Managing multiple design and development projects, ranging from initial concept, product definition, design & development, and transfer to manufacture

- Leading and working with the project teams to solve challenging design, mechanical engineering, electronics, and software challenges
- Ensuring goals are met in areas including customer satisfaction, safety, quality and team member performance
- Managing project timelines, budgets and risks
- Ensuring clear communication and awareness of project status with respect to timeline, budget and quality with internal stakeholders at all levels including Directors
- Managing, allocating and approving resource for projects, and managing interdependences between projects
- Managing relationships with our clients, building trust and collaboration
- Capturing business opportunities from ongoing client project activities
- Creating project proposals/quotations including defining project schedules and budgets
- Producing accurate and timely reporting of project status to clients and internal stakeholders

4. WHAT WE'RE LOOKING FOR...

4.1 Essential:

- A 1st or 2:1 degree in an engineering or other relevant discipline
- A minimum of 2 years' project management experience, managing medical device design and technology development projects
- A project management track-record gained within a highly technical and team-oriented environment
- Strong organisational and time management skills with experience of formal project reporting
- Ability to clearly communicate ideas and work flexibly within a dynamic, multidisciplinary team
- Excellent written and verbal communication skills with an articulate and diplomatic manner
- Experience of planning multiple parallel tasks and defining project scope, goals and deliverables
- Ability to track project progress and deliver projects on-time and to budget
- Ability to address issues as they arise, and both make and drive decisions
- Excellent presentation and interpersonal communication skills
- Strong stakeholder management

4.2 Desirable:

- Experience working to ISO 13485 and ISO 14971, or to the equivalent regulations and requirements of the FDA
- Experience working within a consulting environment
- An industry recognised Project Management qualification or certification

5. WHY YOU'LL LOVE WORKING HERE

We're a dynamic and fast-growing engineering consultancy that takes pride in its outstanding work and supportive work environment.

As a member of our team, you'll collaborate with a diverse group of skilled professionals who excel in their respective fields. Our strong community is built upon effective communication and happy employees, collaboration in project work and regular social events are the norm.
